IDI's SDGs Audit Model (ISAM)

<https://www.idi.no/en/isam>

<https://www.idi.no/work-streams/relevant-sais/auditing-sdgs>

Key features of the SDGs implementation audits

SAs with diverse contexts and capacities

Future oriented audit approach

WOG approach, coherence, multistakeholder engagement and leave no one behind

National targets linked to SDG targets

New concepts e.g. Health services resilience, Sustainable public procurement

Partnership with stakeholders e.g. WHO

Build a strategic audit portfolio for SDGs audit

Mainstream audit quality / provide independent quality assurance

Mainstream audit impact / support for FAI checklist

Include public health in disaster management governance structures and policies

Establish or strengthen of existing coordination structures horizontally and vertically for public health risk management

Ensure essential public health functions during emergencies

Focus on preparedness for future events

Include civil society organisations in policy development to a larger extent

Include focus on those left behind/vulnerable groups specifically in health policies and plans

Cover gaps in capacities that constitute a resilient national public health system

Update preparedness plans and strengthen focus on risk management

Audit of strong & resilient national public health systems (linked to SDG 3.d)

Promote the social and economic development of small and medium-sized enterprises

A system of recognition to promote equity, inclusion and empowerment of vulnerable populations

A SPP professionalization strategy for officials in charge of public contracting and state suppliers

National purchasing law to include criteria of environmental sustainability and inclusion of the vulnerable population,

Develop an action plan that allows for increased communication and coordination with local governments

Coordination between sectors involved in SPPs, through inter-institutional agreements

Audit of Sustainable Public Procurement (linked to SDG 12.7) for 14 SAIs in OLACEFS

Public procurement body to analyze the applicability of regional good practices on SPP related to vulnerable sectors

Audit Impact is a **SHARED RESPONSIBILITY**
